Subject: Motivation Letter for The Artificial Intelligence Master's programs in Romania

Dear Members of the Admissions Committee,

My name is Abderrahim Abdallah. I am currently completing my Bachelor's Degree in Systems of Computer Science. I am writing this letter to express my sincere and strong interest in the Artificial Intelligence Master's programs in Romania.

Growing up in Algeria, a country undergoing rapid digital transformation, I became increasingly aware of the strategic importance of emerging technologies. And with the growing impact of artificial intelligence across industries it made it clear to me that specializing in this field is both a personal ambition and a meaningful way to contribute to technological progress. My academic background has provided me with a solid foundation in programming, algorithms, and data structures, that evolved into a strong interest in AI and its practical applications.

A defining moment in my journey was winning the "National Salon on Artificial Intelligence Projects and Their Role in Promoting Sustainable Security and Protecting the Future." Selected among 49 teams nationwide, my team, "NEXOR Club," developed an AI-based cybersecurity solution over several months. This experience strengthened my ability to approach complex problems, collaborate effectively under pressure, and engage with experts in the field, further deepening my interest.

I have chosen Romania for its internationally recognized institutions and its dynamic environment that offers an ideal setting to gain both technical expertise and a global perspective. Receiving this scholarship would allow me to fully dedicate myself to achieving academic excellence and maximizing my potential.

I am confident that this program will equip me with the expertise and perspective required to contribute meaningfully to the advancement of artificial intelligence. Thank you for your time, and I hope you consider my application favourably.

Yours sincerely,
Abderrahim Abdallah
